

LEWISBURG ELECTRIC SYSTEM RECOGNIZED AS A RELIABLE PUBLIC POWER PROVIDER

Lewisburg, TN, March 23, 2021— Lewisburg Electric System has earned a Reliable Public Power Provider (RP₃)[®] designation from the American Public Power Association for providing reliable and safe electric service.

The RP₃ designation, which lasts for three years, recognizes public power utilities that demonstrate proficiency in four key disciplines: reliability, safety, workforce development, and system improvement. Criteria include sound business practices and a utility-wide commitment to safe and reliable delivery of electricity. Lewisburg Electric System joins more than 275 public power utilities nationwide that hold the RP₃ designation.

“I think over the last year or so, we’ve seen the vital importance of running a reliable and safe utility,” says Aaron Haderle, Chair of APPA’s RP₃ Review Panel and Manager of Transmission and Distribution Operations at Kissimmee Utility Authority, Florida. “The utilities receiving the RP₃ designation have proven that they are committed to running a top-notch public power utility by implementing industry best practices.”

“We couldn’t be prouder to be honored with this designation,” said Brad Medley, General Manager of Lewisburg Electric System. “This is the culmination of a lot of work from a lot of people who really care about powering our community. But this designation is not a final destination. We are committed to continuing to look for ways to improve our operations and service to our customers.”

The American Public Power Association has offered the RP₃ designation for 15 years now. APPA is the voice of not-for-profit, community-owned utilities that power 49 million people in 2,000 towns and cities nationwide. APPA advocates and advises on electricity policy, technology, trends, training, and operations.
